

Dashboard Design

Date	17 August 2026
Project Name	AI Career Pulse: Decoding the Job Market

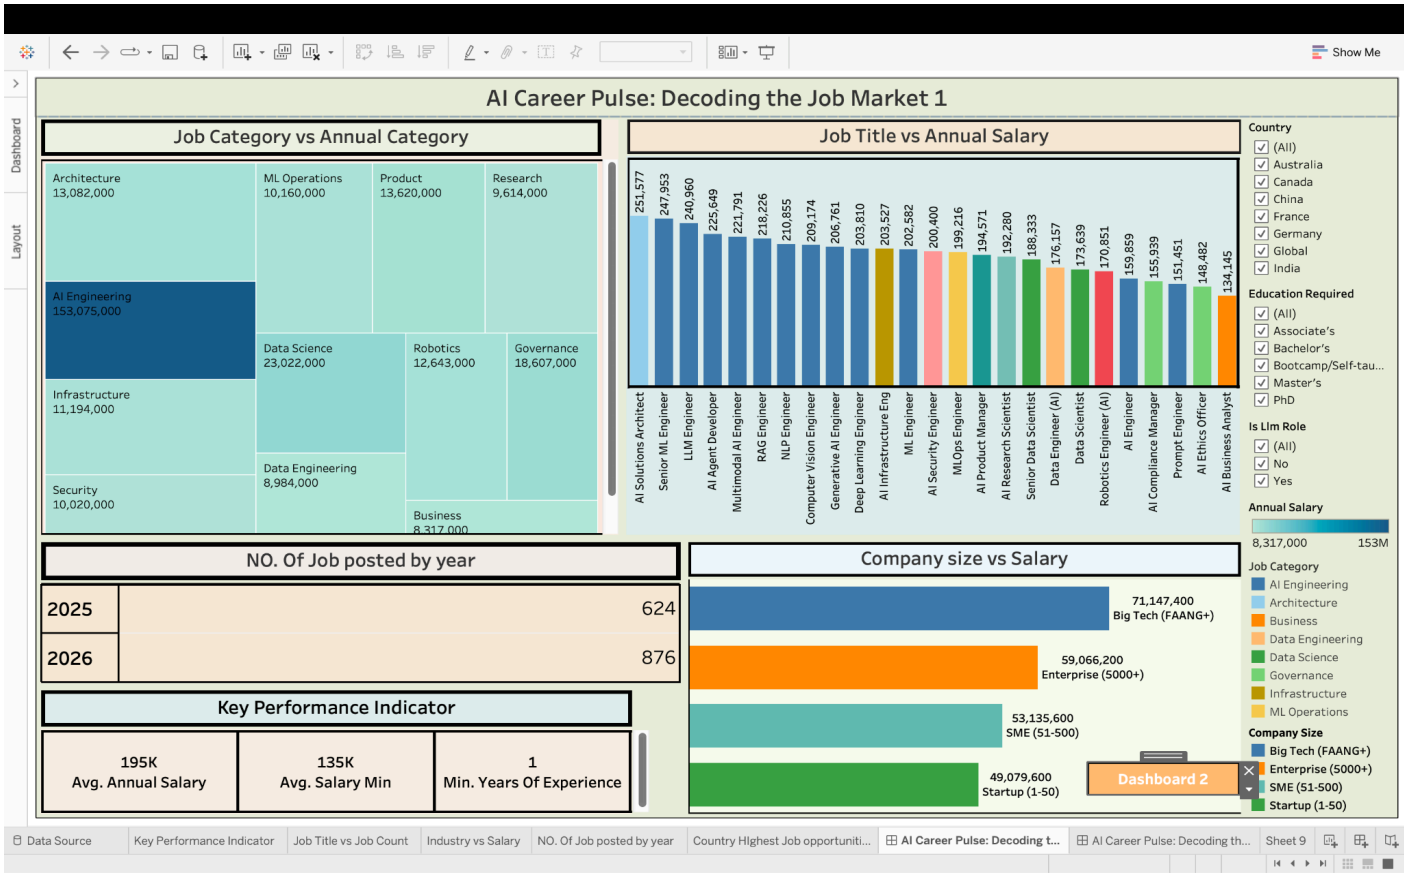

Activity 1: Interactive and Visually Appealing Dashboard

The dashboard is planned to show AI job-market analysis in a clear, kind of compact way. It blends KPI cards , a treemap, bar charts, a time-based view, a stacked industry chart and also a world map. Because of all these pieces, the whole layout is split across two dashboard views, so salary, job-volume, industry, company-size, and location insights can be seen without that annoying overcrowding on one screen.

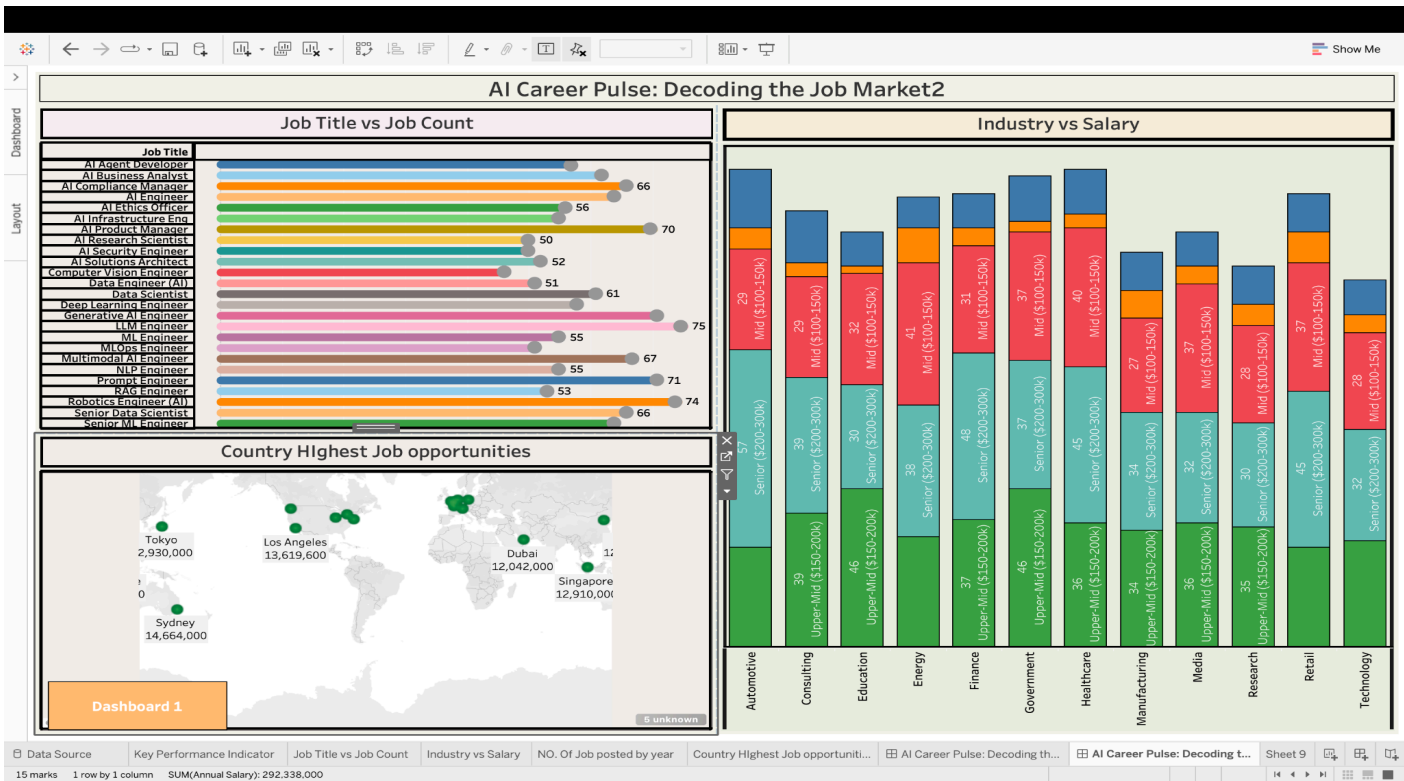

Dashboard Components

Dashboard Element	Chart Type	Purpose
Job Category vs Annual Salary	Treemap	Displays the relative salary measure for AI job categories
Job Title vs Annual Salary	Bar Chart	Helps compare annual salary across job titles
Number of Jobs Posted by Year	Year-based chart	Shows job-posting volume for 2025 and 2026
Company Size vs Salary	Horizontal Bar Chart	Compares the shown salary measure across company-size groups
Key Performance Indicators	KPI Cards	Summarizes average annual salary, average salary minimum, and minimum years of experience
Job Title vs Job Count	Horizontal Bar Chart	Compares posting counts across AI job titles
Industry vs Salary	Stacked Bar Chart	Compares salary bands / categories across industries
Country Highest Job Opportunities	World Map	Adds geographical context for AI job opportunities

Dashboard1

Dashboard2

Major Outcomes / Key Insights

- The dashboard shows 624 job postings for 2025 and 876 for 2026, so yeah it indicates a higher job-posting volume in 2026.
- The KPI area reports an average annual salary around \$195K and an average salary minimum around \$135K.
- AI Engineering ends up as the largest category by the displayed salary measure in the treemap, which feels consistent with what people usually expect.
- The job-title salary chart shows noticeable spread in annual salary across roles, and it even suggests some positions are consistently higher, not just slightly.
- The time based view supports the upward trend, since the 2026 numbers remain stronger year over year.

Activity 2: Publish Dashboard on Tableau Public

The completed dashboard has been published to Tableau Public.
